[App gives feedback]

Storyboarding is a visual representation of a user's experience through a sequence of scenes or events

A **user journey map** represents the complete experience of a user while interacting with a product, service, or system.

For example, for a **Smart Teaching-Learning Application**:

Stage	User Action	User Thought	Emotion	Pain Point
Login	Opens application	"I need to study."	?	Login may take time
Search	Searches for topic	"Where can I find notes?"	bad	Too many resources
Recommendation	Views recommended content	"This looks useful."	good	—
Learning	Studies video/notes	"Now I understand."	?	Difficult topic
Quiz	Attempts quiz	"How well did I perform?"	anx	Questions may be difficult

Stage	User Action	User Thought	Emotion	Pain Point
Feedback	Checks score	"I need more practice."	bad	Limited explanation
